# ART & CULTURAL COMMISSION AGENDA REPORT

## MEETING OF JUNE 18, 2019

FROM: STAFF  
DATE: June 9, 2019  
SUBJECT: Capitola Public Works Projects

---

**Recommended Action:** Receive Report

---

### **BACKGROUND**

At the May 14, 2019 Commission Meeting, Capitola Public Works Director attend the meeting to discuss possibilities for public art projects related to public facilities.

The public works department has given the Commission responses to some questions regarding public art projects.

Depot Hill Stairs – Any changes would have to meet current code requirements for that change. For example, if the railing would be a Public Art project, the railing would be required to meet code, not stair treads. If vertical risers were painted, they would have to meet visual contrast requirements.

Fish Tank on Wharf - In order to collect animals from the ocean, the city will need a Scientific Collecting Permit (SCP) from CDFW Marine Region. CDFW Marine Region does not recommend releasing animals back into the ocean to prevent any diseases (from handling of people, for example) from entering into the environment. However, if the city wants to proceed with release, then a Letter of Authorization under the SCP that describes exactly how animals will be handled/cared for/released/etc. would be needed. As far as seawater intake/discharge, no permits would be required from CDFW Marine Region, however permits may be required from other agencies.

Public Art on Jetty – Coastal Commission staff did think that the Coastal Commission would be able to support the modification of our permit since this change would not enhance coastal access or protect coastal resources. Her thought was that a better location would be the esplanade or other City owned land. She strongly discouraged the idea of adding this to our existing permit as it would reset everything and would likely not end up with approval.

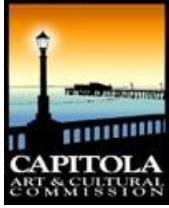

Staff will return at a future meeting with information on Rispin Park and the Capitola Public Library.
