CBC 11B-202.4 regulates accessibility requirements for existing public and commercial
buildings. All new work shall comply with current code provisions. However, projects that are
less than or equal to a construction cost valuation of $166,157 need only apply an additional
20% (minimum) of the construction costs to existing features in order to make them accessible.

The following costs shall include detailed estimates for all elements and shall
be attached to this form:

A. Cost of Construction for the proposed project
   (without additional accessible features)  $___________________

B. Total amount spent on other projects at this
   area of work within the past 3 years  $___________________

C. Total Cost (Line A + Line B)  $___________________

If Line C exceeds $166,157, then full compliance is required of all accessibility elements listed
in items 1 through 6 below.

If Line C is less than $166,157, then 0.20 x (amount in Line A) = $___________________

This is the minimum amount to be spent on accessible elements in the order of priority listed
below
